

# Turnitin® and Moodle

## Turnitin's Integration for Moodle Users

### WHY TURNITIN?

- Recognized around the world as the standard in online plagiarism prevention.
- Turnitin currently protects over 9.5 million students in over ninety countries from thousands of universities, colleges, and high schools.
- Our in-house version of the Internet contains over 6.6 billion pages, and we add and update millions of pages daily.
- Turnitin currently receives and processes tens of thousands of student submissions per day.
- Submitted papers are compared not only against live Internet pages, but also against academic and professional content not available on the public internet, including millions of commercial pages from books, newspapers, and journals.
- Students and instructors can submit papers in a variety of formats, including Microsoft Word®, PDF, PostScript, WordPerfect, plain text, HTML, or any text-based document via cut and paste.

### ENHANCED INTEGRATION

Turnitin now offers integration with the Moodle Course Management System. Once integrated, the Turnitin assignment gives Moodle users convenient access to Turnitin's suite of learning tools including Plagiarism Prevention and GradeMark™, all without leaving the familiar Moodle environment.

### PROVEN PLAGIARISM PREVENTION

Integrating with Turnitin's world-renowned plagiarism prevention system makes identifying unoriginal work easy. Turnitin's Overall Similarity Index helps you determine instantly what portion of a student paper matches outside sources. If a paper contains plagiarized material, the Originality Report will help you investigate any suspect passages.

### REVOLUTIONARY ONLINE GRADING

The Turnitin assignment also lets you grade student papers within Moodle using GradeMark, our revolutionary online grading system. GradeMark is fast and efficient, paper-free, and gives your students the critical feedback necessary for improving writing skills. The assignment even provides students single-click access to their graded papers from the Moodle student view.

### GRADES KEPT IN SYNC

Installing the Turnitin assignment doesn't mean you have to change how you track grades within Moodle, because the Turnitin assignment integrates seamlessly with the Moodle gradebook application. Any grades you enter from Turnitin appear automatically in your Moodle gradebook, giving you easy access to your class grades within both applications.

*"By presenting the actual paper the student plagiarized, I could stop all the excuses immediately and move on to the most important thing: academic honesty. I worked with this student for the rest of the semester. He was diligent about bringing drafts and getting papers done on time. I failed him on the plagiarized paper but his final grade was a B, which he had earned through his own hard work. I consider this a success story."*

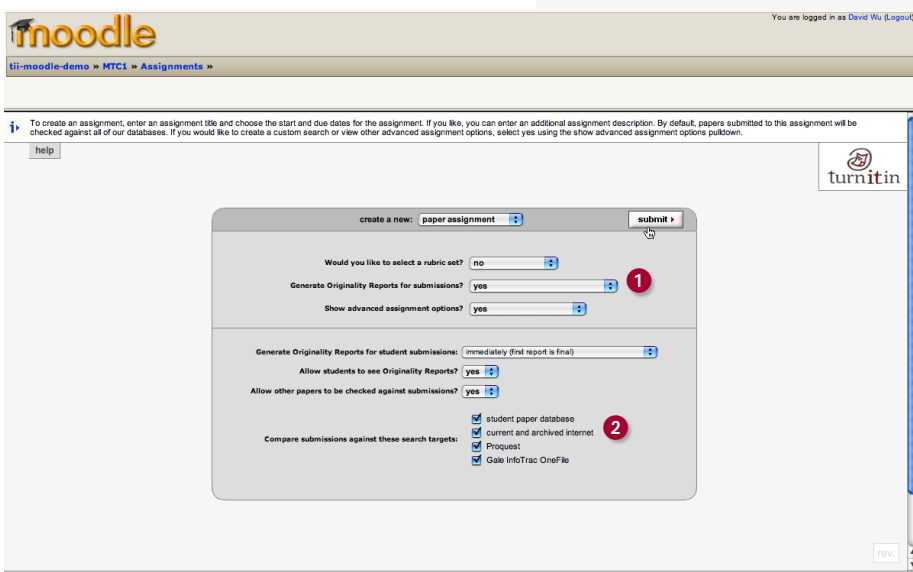

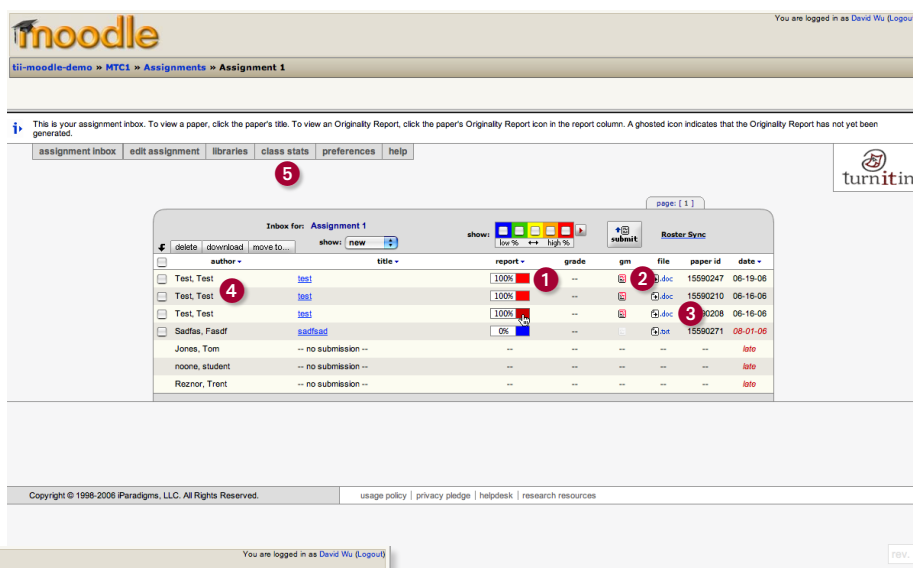

—Martha Alston  
Central Carolina Technical College

### BEST OF BOTH WORLDS

You rely on Moodle to manage your courses and you trust Turnitin's proven track record of promoting academic integrity in the classroom. With the Turnitin assignment, you can use the best of Turnitin's suite of learning tools seamlessly within Moodle.

## Familiar Interfaces

The inbox for a Moodle Turnitin assignment closely resembles the inbox Turnitin users are familiar with. From the inbox you can access Originality Reports and view report scores **1**, grade a paper with GradeMark **2**, or download a paper in its original file format **3**. A new feature of the inbox allows you to see all students in your class, including those who have not yet submitted a paper **4**. Clicking the class stats link gives you detailed statistics on class activity and submissions **5**.

## Creating Assignments

The page for creating a Turnitin assignment within Moodle is similar to the Turnitin assignment creation page. From this page, you can select to have Originality Reports generated for an assignment **1** and select which databases you would like students' submissions searched against **2**. The assignment options also allow you to decide whether or not to allow late submission and to choose whether or not to allow students to resubmit.

Features	Benefits
Familiar Moodle and Turnitin interfaces	If you are a Moodle user and have used Turnitin before, there is nothing new to learn.
Proven plagiarism prevention	Turnitin's world-renowned plagiarism prevention system is a proven deterrent to plagiarism and can help stop plagiarism before it starts.
Online grading with GradeMark	Our revolutionary new online grading system saves time and helps instructors provide students with constructive feedback faster than ever before.
Integration with Moodle and Turnitin gradebooks	All grades entered in Turnitin automatically flow into the Moodle gradebook, ensuring that your grades are always in sync.
Easy to setup and customize	Your administrator installs the integration on your Moodle server. After installation instructors can add Turnitin assignments to their classes.

Since 1996, Turnitin has been helping millions of faculty and students in over ninety countries improve writing and research skills, encourage collaborative online learning, ensure originality of student work, and save instructors' time.
